

FRESH VEGETABLES

GROWN USING NATURAL
AND EARTH-FRIENDLY
METHODS

FRESHNESS ENSURED
FROM FIELD TO SHELF

FRESH VEGETABLES

AUGA organic vegetables are chemical-free, sustainably grown using modern technology, without depleting the soil.

Our modern, organic farming equipment, enhances the fertility of the land and is built specifically for cultivating and harvesting vegetables.

Farm to shelf process control ensures that our vegetables are always top quality and taste great.

We carefully hand select the freshest vegetables and pack them on demand in our local factory, before delivery.

FRESH MUSHROOMS

AUGA organic mushrooms are grown in modern farms using the latest mushroom cultivation technology and equipment, along with our own patented solutions.

We strictly control the production process, from the collection of raw materials, crop growing and picking to final product delivery.

The mushrooms are hand-picked and delivered to shops daily, so they are always fresh and taste great.

We produce our own organic mushroom substrate using composted materials collected from regional organic farms.
